Brief description of work distribution

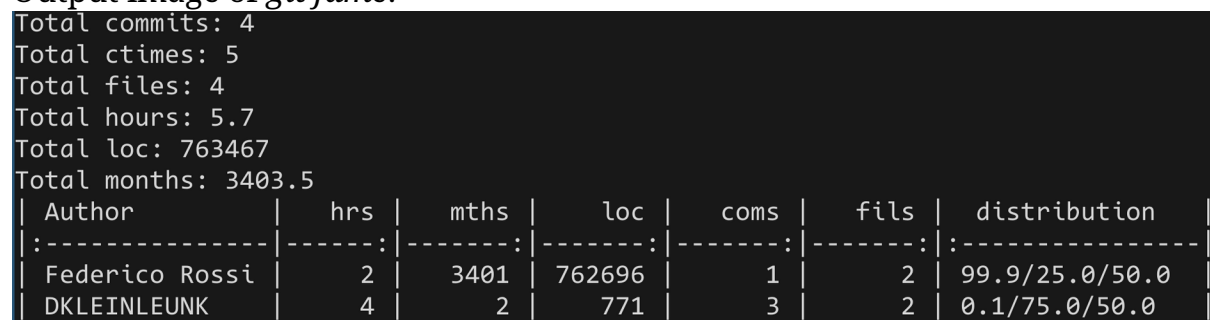

The solutions are organized into three separate Jupyter notebooks, namely `exercise-1.ipynb`, `exercise-2.ipynb`, and `exercise-3.ipynb`, each containing the code, calculations, and figures for its respective exercise.

The work was divided such that David completed Exercise 1, while Federico completed Exercises 2 and 3. We each prepared our own notebooks for the exercises we were responsible for, and we each wrote the corresponding sections of the report ourselves. After the individual sections had been written, Federico went through the text as a whole and shortened parts of it where necessary in order to bring the final report closer to the expected page limit. David made the present document and set up the GitHub repo.
